

Arizona Chemical's Savannah Plant is the world's largest crude tall oil (CTO) bio-refinery. CTO, derived from the Kraft pulp and paper making process, is fractionated into a variety of raw materials that are commonly used in the Adhesive Industry.

Arizona Chemical's Savannah Technology Center serves as the North American base for product development and technical service for the Adhesive Industry and the other markets supplied by Arizona Chemical. The lab portion of the tour will showcase some of Arizona Chemical's key competencies, which include surface science, rheology, emulsification, cationic polymerization and pine chemistry.

All interested manufacturers are encouraged to attend. Details for this event are shown below. Space is limited, so please contact Mary-Jo Caliguire at (904) 928 – 8955 or mcaliguire@azchem.com.
