

WATERBORNE ADHESIVES SHORT COURSE

APRIL 15-16, 2012 • GRAND HYATT • DENVER, COLORADO

CO-LOCATED AT THE ASC 2012 SPRING CONVENTION

Who Should Attend?

This course is ideal for adhesive and sealant chemists, application engineers, sales and marketing staff from manufacturers, raw material & equipment suppliers and consumer goods companies that use adhesives and sealants.

Learn About this Extremely Versatile Line of Adhesives

Course Description

Waterborne adhesives are extremely versatile in their formulation and application functions, making them a logical choice for bonding many types of substrates. Some of the major advantages of waterborne adhesives are the absence of volatile organic compounds (VOCs) and the ease of clean up after application. A strong knowledge of how waterborne adhesives can help you serve your customers better and ultimately add to your bottom line.

Program Topics (tentative)

- Antioxidants/Stabilizers/Biocides
