

Special Announcement

I am proud to announce that Bob Reynolds has joined Albion Engineering Co. as General Manager. I have known Bob for many years and am quite pleased he elected to join the Albion team. He brings both solid business skills and a life long knowledge in both sealants and dispensing tools. I have known both Bob and his brother, Bill, for a very long time. Ironically, you could say, like me, they grew up in the dispensing tool business for in the 1980's and 90's they took over their family businesses, Calbar and Kenmar. Calbar, a paint and caulk manufacturing company, and later also a sealant/waterproofing distributor for the Philadelphia region, and Kenmar, a caulking gun manufacturer. Actually, back in the 1930's it was Calbar and Bob's grandfather who pushed my grandfather into developing the first smooth rod caulking gun and changing the direction of Albion from an elliptical gear manufacturer to a dispensing tool manufacturer. Most recently, Bob was managing sales of waterproofing products for Marjam Supply Company in Pennsylvania, New Jersey & Delaware.

Albion's mission is to provide the market place with Dispensing Solutions in the form of hand tools. Bob clearly will only enhance our ability to meet our mission and strengthen our ability to service your needs.

Please feel free to contact Bob at any time and use him as a resource to grow both Albion's and your business ---- Extension 15 ---- bob@albioneng.com

Thank You
Sincerely,

A handwritten signature in black ink that reads "Mark Schneider". The signature is written in a cursive, flowing style.
