

Franklin Adhesives Acquires Acrylic Hot Melt Technology

03-27-07 Franklin Adhesives is pleased to announce the acquisition of the range of acrylic hot melt pressure sensitive adhesives as well as the technology and manufacturing assets from SI Group, Inc. Franklin was previously responsible for the marketing and distribution of this line of adhesive products called Acrynax since 2004. The acquisition of this unique PSA adhesive provides Franklin with greater ability to meet the needs of its customers. Acrynax 100% solid acrylic hot melts have the performance properties of a solvent adhesive with the benefits and reduced operating expenses of hot melt technology. Acrynax performance advantages include water, chemical, UV, and plasticizer resistance. They are also skin friendly and have excellent die-cuttability. Acrynax is currently used in the advanced wound care, medical products, personal care, construction, and automotive industries. Please Contact David Burns at 614-445-1839 for more information.
