

Table of Contents

Global Markets: An Economic Update

Update on the Japanese Adhesive & Sealant Market

Yoshihiro Hongo, Cemedine Co., Ltd.

Growth in the China Adhesive and Sealant Industry

Yan Zhang, Kensinger Group, Inc.

Update on the North American & European Adhesive & Sealant Markets

Dave Nick, DPNA International

Meeting Workplace Challenges

Embracing Cultural Understanding

Marlene Kreidler, M.A., Columbia Union College

Future of the American Workforce

Cathy Fyock, Innovative Management Concepts

Corporate Culture, Creativity and You

Sam Berkowitz, H.M. Royal, Inc.

Polyurethanes: Raw Material Trends

Latent Reactive PU-Dispersion Adhesives

Jeffrey Dormish, Bayer MaterialScience L.L.C.

Latest Developments in Adhesion Science

Toughening of Epoxy Systems – The Influence of Cure Schedule on Adhesive Properties

Terry Gordon, Bondmaster

Influence of Emulsion Polymer Design on High Speed Liquid Adhesive Applications

Dennis DeWacker, Celanese Emulsions

A Study of the Evolution Rate of Volatile Methyl Siloxanes from Curing Sealants

Chris Davis, Dow Corning Corporation

Semi-Crystalline Polyester Polyols for Multi-Purpose Adhesives

William McNamee, UNIQEMA

Elastic Adhesives for Tiles/Panels to Exterior Walls

Yoshihiro Hongo, Cemedine Co., Ltd.

Masato Akimoto, Cemedine Co., Ltd.

Monday Luncheon Keynote

Patrick J. Cleary, National Association of Manufacturers

Hot Topics Roundtable

Outlook on Oil and Natural Gas

Jay Jackson, Eastman Chemical Company

Raw Materials

Tom Brewer, DeWitt & Company

Sales & Marketing Peer Group

Lean Marketing, A Cost Effective Business Development Strategy

Ronald Lilly, Alltis Corporation

Green Building Regulations & Issues

Green Globes Program

Ward Hubbell, Green Building Initiative

BEES Program

Barbara Lippiatt, National Institute of Standards & Technology

Trends in High Growth Markets

An Update on the Construction Industry

Ed Hudson, National Association of Home Builders Research Center (NAHBRC)

The RFID Revolution: RFID and its Impact on Electronics and Packaging

Rory Wolf, Enercon Industries Corporation

Best Business Practices

Globalization – The Tail Gets Longer

John Lowry, The CHEMARK Consulting Group

Overview of U.S. Foreign Commercial Service; How the U.S. Government Can Assist You in International Business

Brian Miller, U.S. Export Assistance Center

"Best Places to Work" Program

Jeff Nally, CLARCOR Air Filtration Products

High Impact Growth - Louisville Chamber of Commerce

Lisa Bajorinas, Greater Louisville Chamber of Commerce

Innovations in Pressure Sensitive Adhesives

Low Cost High Performance Acrylated Tackifying Oligomers Designed for UV/EB Pressure Sensitive Adhesives

Deborah Smith, Sartomer Company

High Performance Styrenic Block Co-Polymer & Featuring a Novel Hybrid Mid-Block Phase

Donn DuBois, KRATON Polymers U.S., LLC

Acrylic Tri-block Copolymer Gels for Material Processing Applications

Michelle Seitz, Northwestern University

Getting to Green – Raw Material Feedstocks

Green Macrotrends and the Impact on Adhesive Resins

Marc Jackson, Arizona Chemical Company

Soy Materials as an Alternative to Petrochemical Feedstocks Within Adhesive Formulations

Leland Orr, Omni Tech International

TBAC – An Update on the State and Local Implementation Process, Its Properties and How It Can Be Used as a VOC and HAP-Compliance Tool

Daniel Pourreau, Lyondell Chemical Company

Advances in Hot Melt

Reduction of Issues for the Processing of Polyamide & Polyester Hot Melt as Adhesives

Larry Saidman, Nordson Corporation

Tack Testing and Dynamic Mechanical Analysis of Nonwoven Hygienic Hot Melt Adhesives

Andres Sustic, H.B. Fuller

Impact of New Terpene Phenols in Hot Melt Adhesive Formulations

Mike Moran, Arizona Chemical Company

Metallocene Polymers from Extended Open Time to Pressure Sensitive Adhesives

Sebastijan Bach, Clariant GmbH

Advances in Application Equipment

The Convergence of 1K and 2K Packaging for Adhesives and Sealants

Terry Horner, TAH Industries Inc.

Non-Contact Slot Coating Technology Advancement: For Applications Including Clear Label Production

Larry Saidman, Nordson Corporation

UV/EB Evolutions in Curables

New Acrylated Oligomers for UV/EB Curing Provide Excellent Transparent Adhesion for Lamination of Flexible and Rigid Polycarbonate Substrates

Deborah Smith, Sartomer Company

Using Rheology to Characterize UV Cured Epoxy Resins

Philip Rolfe, Malvern Instruments, Inc.

The following authors/presenters have requested that their presentation not be included on the official CD-ROM:

Opening Keynote Address

Bill Samuels, Jr., Makers Mark Distillery

Meeting Others' Expectations While Handling Multiple Demands on Your Time

Bill Lea, Dale Carnegie Group

Polyols Derived from Natural Oils for Polyurethane Applications

William Koonce, The Dow Chemical Company

Controlled Reactivity of Prepolymer for CASE Applications

Daphne Robinson, The Dow Chemical Company

Review of SPUR™ Developments

Misty Huang, GE Advanced Materials-Silicones

Expanding Usability Range of Solvent-free Aqueous Polyurethane Adhesive Coatings

Pavel Ilmenev, Cytec Industries

Nanotechnology

Lynn Penn, University of Kentucky

Presentation on LEED

U. S. Green Building Council

Growing the Sealant Market - Getting More Users To the Marketplace

Shawn Williams, GE Advanced Materials-Sealants & Adhesives

An Update on the Electronics Industry

Doug Dixon, Henkel Corporation

Innovative UV Curable Liquid Methacylated and Epoxidized Rubbers

Harumasa Doi, SEPTON

New Breakthroughs for the Chemical Industry

Matthew Carr, Biotechnology Industry Organization (BIO)

2-Component Cartridge Programs

Greg Rokoff, Accumetric LLC
